

bBHC, a life science company, We make all human tissues and organs.

The world's first and only company that uses pluripotent stem cells without side effects to realize a vision through overcoming incurable human diseases and create the future, bBHC is creating a new path for the biopharmaceutical industry with a new paradigm.

STRI (bBHC STEM CELL TREATMENT & RESEARCH INSTITUTE) developed the world's first pluripotent stem cells without side effects and named them nEPS (new Elicited Pluripotent stem cells without side effects by natural compound).

STRI has succeeded in differentiating pancreatic beta cells, hepatocytes, nerve cells, chondrocytes, osteoblasts, kidney cells, hematopoietic stem cells, and T cells using nEPS with a vision to overcome incurable diseases of mankind.

bBHC has registered 309 related patents in the US, EU, Israel, Singapore, Australia, Korea, Japan etc.

bBHC, A company that creates the future

STC NARA

STC Nara, which has obtained ISO22716, the international cosmetic manufacturing and quality control standard, is a cosmetics manufacturer that has been researching, developing, manufacturing and producing the world's highest quality cosmetics for the past 30 years. From product planning to final product shipment, STC Nara provides total services in all processes, providing customer-oriented services in any field, including customized cosmetics and cutting-edge cosmetics.

STC NARA provides OEM as well as ODM services and manufactures skin science cosmetics.

What is ISO 22716 ?

Cosmetics GMP (Good Manufacturing Practices) is a guideline standard for product quality and product quality through systematic SSOP (sanitary operation standards), process control, verification, and validation for the production, management, storage and distribution of cosmetics. It is a standard that focuses on traceability and accountability in the production and distribution of products.

CELGEN

Down-aging Solution that rejuvenates skin cells
from within through the cell communicating system

International Cosmetics Ingredients Dictionary :
Energy Water

Skin science cosmetics that realize down-aging

The world's best stem cell technology and differentiated raw materials

— ENERGY WATER

Energy water registered in ICID (International Dictionary of Cosmetic Ingredients) is the most functionally suitable water for life-sustaining phenomena.

By reorganizing the molecular arrangement of water, it increases structural order, reduces entropy, and plays a role in returning abnormal cells to normal cells.

**The particles of energy water are much smaller and more uniform,
It has high emulsification and absorption power.**

**Normal purified water
emulsification**

**ENERGY WATER
EMULSIFICATION**

- Comparison of surface tension and contact angle between energy water and purified water

Energy water has a **lower contact angle than purified water and has good spreadability**. The active ingredients of the product do not roll over the skin but **spread thinly and penetrate deep into the skin**.

Energy water has a lower surface tension than purified water and has **excellent emulsification power, so the use of irritating ingredients can be minimized**.

Pearl Moisture Solution (125ml)

The pearl moisture solution containing energy water, gamma oryzanol, and hyaluronic acid instantly replenishes moisture to dry skin and makes the skin clear and bright. It is suitable for all skin types, has excellent moisturizing properties and is non-sticky.

- ✓ **ENERGY WATER**
- ✓ **Gamma oryzanol**
- ✓ **Hyaluronic acid**

How to use

Use right after cleansing in the morning or evening.

Even when you feel dry, it is good to spray it on your skin with makeup from time to time.

Energy water listed in ICID is the main ingredient in Celgen products.

CELGEN
