97.7°F(36.5°C), the optimum skin
temperature for skin care

Focus

* Science of cell communication - Activating your skin from deep within

With this principle, the cell communicating elements will help improve the damaged skin. Cell 97.7 cell-communicating system continuously protects the skin from various damaging and harmful environments through the stem cell culture, niacinamide, adenosine phosphate, retinol, etc. It introduces amazing down-aging skin care that awakens pure and powerful skin from within.

Instilled by the philosophy
"Contribute to humanity with sound mind and development of cell therapy product",
STC (Soul, Treatment, Cell) that was founded in 1989 was expanded and
reorganized into STC Life Science Research Center in 1993.
Since then, it focused on research and development through the Stem Cell Research Center,
Agricultural Science Research Center, Life Science Research Center, and New Drug Research Center.

As a result, it developed the world's first pluripotent stem cell (nEPS) without side effects
in 2013 and applied for 32 patents in 146 countries around the world.

The growth factors that are derived from the cultivation of nEPS were developed
into cosmetic ingredients and listed as the human stem cell culture, STC-HSCM, in the ICID.

In addition, the human stem cell culture STC-HSCM that is derived from nEPS was shown
to be rich in VEGF, HGF, KGF, TGF- β 1, fibronectin, Type1 collagen, as well as,
FGF which is a fibroblast growth factor.

This is an excellent cosmetic ingredient that has been listed in ICID.

*STC-nEPS : newly Elicited Pluripotent Stem Cells Without Side Effects By Natural Compound

Cosmetic manufacturing knowhow of the certified STC Nara

Since establishment in 1989 STC Nara, aided by Life Sciences and Stem Cell Treatment & Research Institute, has been researching, developing and manufacturing innovative beauty products to service our worldwide customers.

Commercialization Of A Human Cord Stem Cell Conditioned Media,

The Exclusive Right To Use Eight Major Raw Materials Registered With ICID

Cgmp-Certified Cosmetics Manufacturing Factory

Certified With Iso Quality Management System (Ksq-Iso9001:2008)

With the Life Science Research Center STRI at the center, STC is creating a new era of young and healthy people in their 100s and 120s through research & development on stem cells, genetics, agricultural life science, cosmetics and health foods.

STC has developed the world's first pluripotent stem cell (STC-nEPS) without side effects. STC was successful in differentiating pancreatic beta cell, cartilage cell, osteoblast, fat cell, nerve cell, and liver cell by using STC-nEPS, and it is creating all types of organs and tissues including heart cells.

STC will improve the quality of people's lives and become a leader of sound scientific culture through the pluripotent stem cell STC-nEPS. In addition, based on Energy Water, STC will overcome hunger by increasing food supply and will improve the global environment by making deserts green again.

Cell Balancing Solution Plus (130ml) & Minus (130ml)

■ Product Introduction

Using Cell Balancing Solutions Plus and Minus one after another will smoothen the skin barrier by controlling the skin ph balance. It is a basic skincare solution to help your skin absorb moisture and nutrients using isoelectric principles.

■ What is an isoelectric principle?

It is a concept which states that molecules having the same number of electrons and the same number of atoms whose atomic masses are greater than that of hydrogen (heavy atoms) tend to have similar electronic structures, similar chemical properties, and heavy-atom geometries. Same principle is used to make your skin condition to a state optimized to absorb nutrients and discharge waste.

- Dual hydro binding of (+)ion and (-)ion
- Spray-type package
